Omar Zandag

Java/Spring Boot Developer

+212 6-74-32-55-59 | omar.zandag@gmail.com

Bachelor's graduate in Computer Systems Engineering with hands-on experience developing and refactoring enterprise web applications using **Django, React.js, PostgreSQL, Java and Spring Boot**. Experienced in designing RESTful APIs, improving legacy codebases, implementing secure authentication mechanisms, and building responsive user interfaces. Passionate about backend development, software architecture, and cybersecurity best practices, with strong teamwork and Agile collaboration skills.

Titrit Technologies | Casablanca, Morocco

Software Developer Intern *04/26 – 06/26*

- Refactored the backend architecture of an enterprise cloud tokenization management platform.
- Redesigned and modernized React.js user interfaces to improve usability and maintainability.
- Optimized PostgreSQL database interactions and backend performance.
- Produced API documentation using Swagger/OpenAPI.
- Collaborated with the development team using Git and Agile methodologies.

THE PREFECTURE OF AGADIR IDA OUTANANE | Agadir, Morocco

Web Developer Intern *05/25 – 06/25*

- Development and implementation of a web application for the management of civil servants
- Designed and implemented RESTful APIs for CRUD operations on entities
- Creation of web interfaces in HTML, CSS and JavaScript
- Data management with MySQL
- Integrated frontend forms with backend services to enable seamless data submission
- Applied secure practices such as role-based access and structured error handling
